*March 26th, 2013*

Seven Star, cotton paper and LED light by Folded Light Art + Design

**Folded Light Art + Design | Cotton Paper Lights**

With a mathematically **complex design** and a very high level of **craftsmanship**, **Jiangmei Wu**'s unique, sensuous lights illuminate a room through amazingly complex and original forms that reinvent the role of lighting in interior design. Each lights is made of **pieces of digitally-cut** and **hand-folded** high quality **paper**, illuminated by a custom LED light, providing a **soft ambience** that highlights the intricacy and the mathematical complexity of the piece. By using original **origami** folding compositions developed by **Wu**, each light shade can be unfolded into flat pieces of paper. Once folded, the paper structures are self-supportive and don't require additional materials to hold them up. **Aesthetic** and **practical**, art and science, Wu's works are unique in their feeling, thought, and craftsmanship.

## .why liquid

**LIQUID** (lik'-wid): 1. a state of matter with definite volume but no definite shape, composed of molecules which move freely among themselves but do not tend to separate like those of gases. 2. a state of matter, between gaseous and solid, that flows and takes the shape of its container.
3. liquid architecture is a symphony of space, but a symphony that never repeats and continues to develop, is an extension of our bodies, and like us, it has an identity. (Marcos Novak)
**It's LIQUID** is a communication platform for contemporary art, architecture and design. It's LIQUID is based on fluidity, motion, connection and accessibility. Making things easy to do. Welcome.
